EASYLAST**3D** CAD/CAM

设计及级放3D鞋楦
Design and grading of the 3D model

🇨🇳 3D鞋楦设计及放码的整套CAD/CAM系统。操作简单，快捷，直观；可以容易地输入鞋楦，修改鞋楦，进行多种放码，包括使用组进行放码，及锁定区域放码
除了包含之前版本（EASYLAST3D 2.6版本）的特色，还增加了组合配件到鞋楦的功能，比如把3D大底或者水台组合到鞋楦上面，生成机器可以铣削的文件（FRA），从而使得软件功能更加完善。

🇬🇧 *Complete CAD-CAM system for the design and the development of 3D shoe last models. This software allows the user to easily import, modify and develop models files, with various possibilities for the elaboration (also in groups) and the definition of constants zones.*
In addition to the features of the previous version (Easylast3D 2.6), the new 3.0 version has been enhanced with the possibility of combining accessories to the last (eg: soles and 3D platforms) and the creation of the milling machines file .FRV ™.

新的用户界面/
NEW USER INTERFACE

由于新的用户界面带有导航功能，用户可以使用左边的面板从一个项目切换到另外一个项目。切换的项目会处于待机状态，在之后重新载入。

Thanks to the new graphical user interface provided with Navigator, the user can switch from one last to another or from one project to another using the left panel of the main window. The eventual project left in favor of fast change to a second embodiment is put on standby and then be taken in loading the user at a later time.
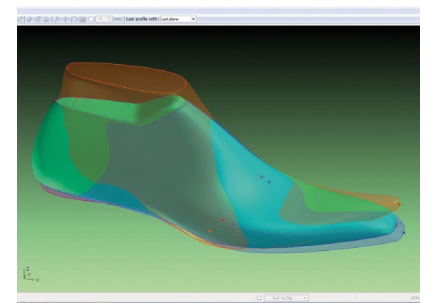

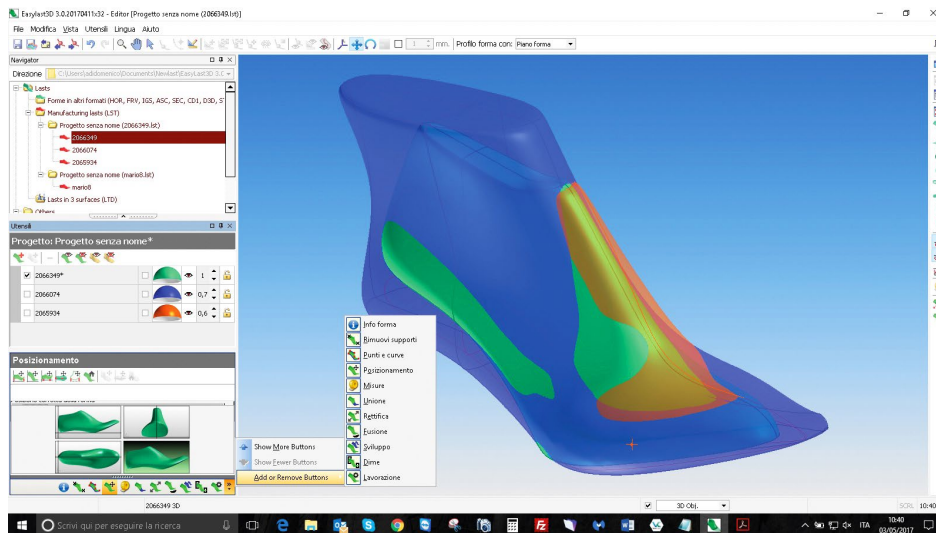

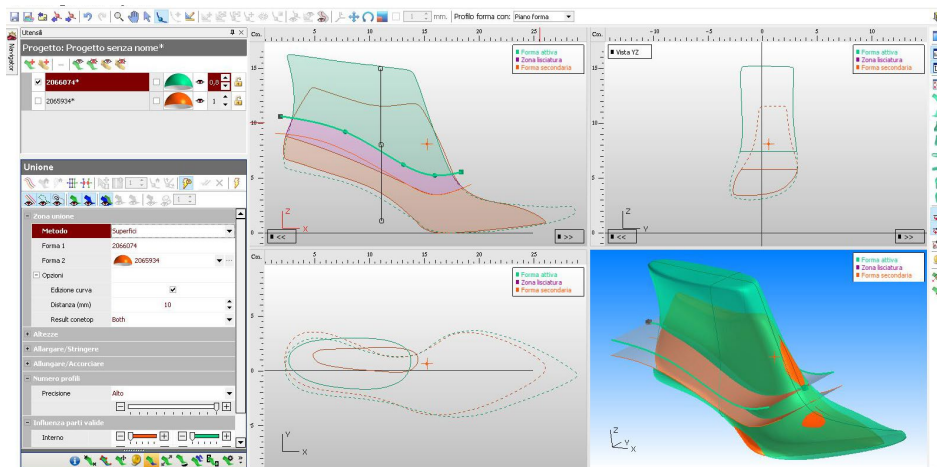

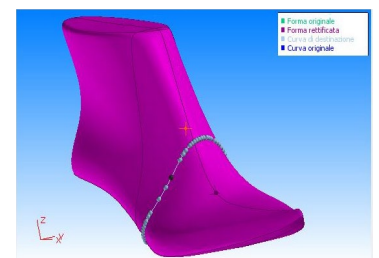

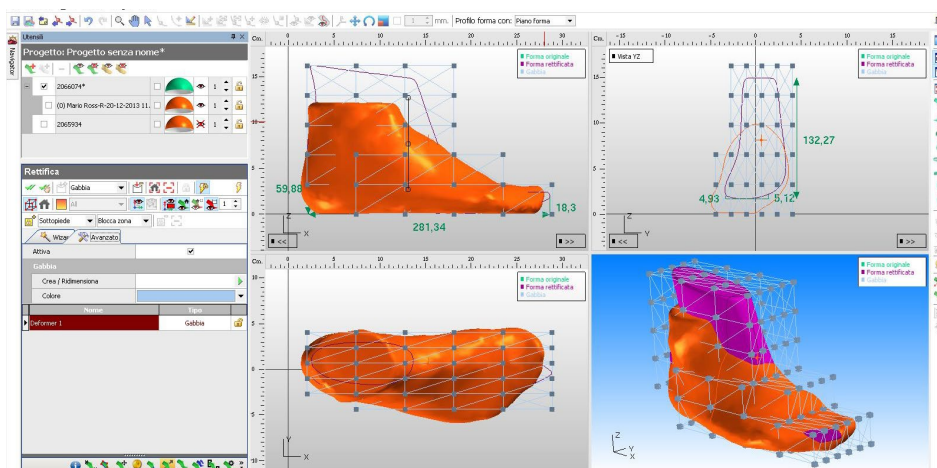

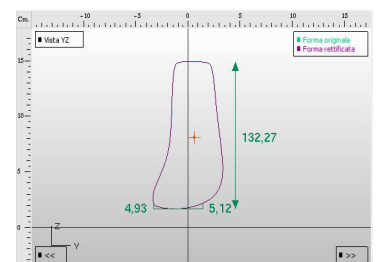

## 改良的编辑器/ *IMPROVED EDITOR*

▸ 可以输入多种实体作为参照物
▸ 可以修改鞋楦的任何部位

▸ *Possibility to import various entities as a reference.*
▸ *Modifications to the last in all its parts.*
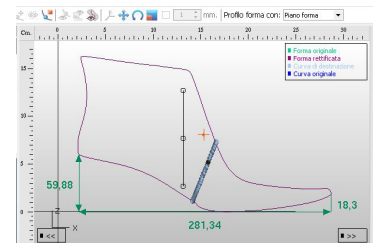

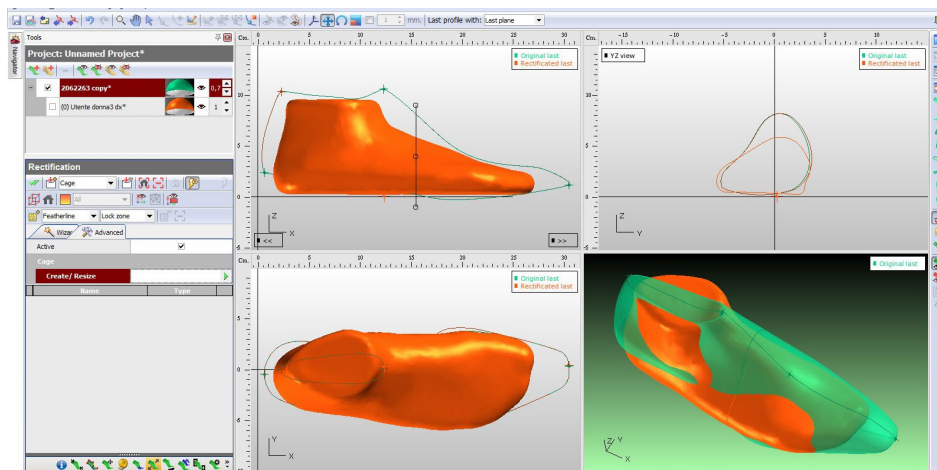

放码/ *GRADING*

新版本的级放编辑器比过去更加形象直观。它包含了很多新的功能，比如锁定整个中底的放码，锁定鞋楦某些区域的群组放码。

Grading editor from the new graphics for a more immediate than in the past. Includes functions such as the maintenance of the insole constant, the grading groups while maintaining a constant part of the last.
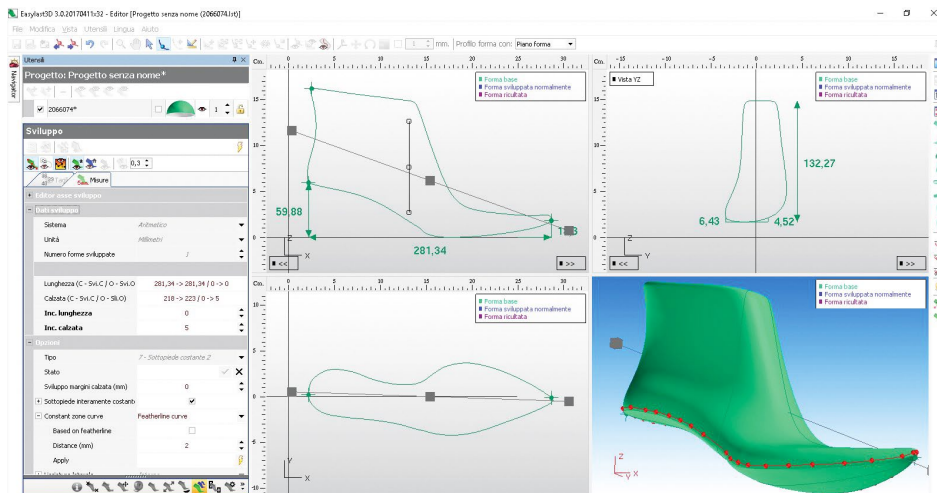

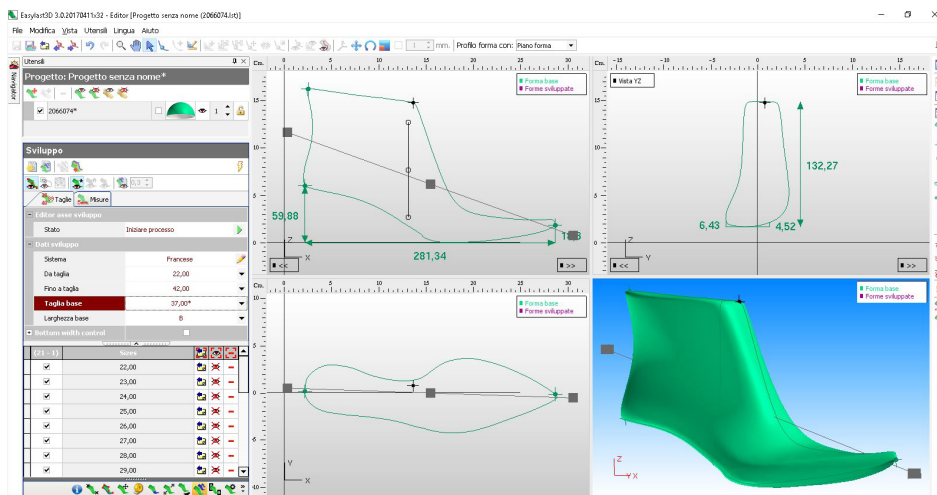

3D附件/ *3D ACCESSORIES*

可以组合一些附件到鞋楦上。比如中底，3D水台，可以直接使用STL格式。最终这个附件会和鞋楦"融合"在一起，生成一个可以在Newlast数控机器上铣削的FRV文件。

Ability to merge some accessories to the virtual form. Bottom insoles or 3D Plateau, also in STL format. At the end of the operation will be "fused" to the last ready to be transformed into a FRV file destined to CNC machines Newlast.
